Class and Departments:
SE, TE, BE
Comps, CSE, IT

Time and Venue:
3:30 PM onwards
Image Processing Lab,
1st floor.

Participation:
30 students

On 11 February 2025, the Computer Society of Xavierites at the Xavier Institute of Engineering organized an enlightening session on the topic of "**Graphic Designing**" The event took place at the Image Processing Lab on the 1st floor and commenced at 3:30 PM. The session featured Mr. Melvin Tharakan, an expert in graphic designing. It was organised by **Mast. Sarthak Ghadge** and **Mast. Kunal Jain** under the guidance of **Prof. Nilambari Narkar** and **Prof. Sulochana Devi.**

Mr. Tharakan started the session by discussing the fundamentals of graphic designing, emphasizing the importance of creativity, aesthetics, and functionality in design. He demonstrated various design tools and software, providing live examples to illustrate their practical applications. He also shared valuable tips and tricks for creating visually appealing and effective designs. The attendees showed great enthusiasm and actively participated in the Q&A session, where they had the opportunity to seek advice and clarify their doubts.

The event concluded with a vote of thanks to Mr. Tharakan for his insightful presentation and to the organizers for their efforts in making the session a success. The attendees left the session with a deeper understanding of graphic designing and a renewed interest in exploring this creative field further.

Student Feedback:
The response was very positive. Students showed keen interest into learning about the field of Graphic Designing and took with them renewed interest in the field.
