Description

- This workshop was conducted for TEs and BEs of COMPS and IT department, aiming at introducing students to the basics of android application and development.
- Android Studios software was shared amongst the students for this workshop.
- The speakers covered the following topics during the workshop:
  - Installation of Android studios.
  - Installation of gradle.
  - Brief introduction of the different views available.
  - Difference between coding and the drag and drop feature.
  - Updating android studios.
  - Downloading the apk file and viewing from an android device.
  - Fragments.
  - Playing pausing and stopping audio / video.
  - Database (sqlite).
- By the end of the workshop, students were able to create an android application on their own.
- The workshop was overall, a huge success and the students gave a positive feedback about the speakers and the workshop.
