**No of participant: 35**

**Description**

- This workshop was conducted for FEs, SEs and TEs, aiming at introducing students to the basics of web application and development.
- XAMPP and Sublime Text software was shared amongst the students for this workshop.
- The speakers covered the following topics during the workshop:
  - Client and server side languages.
  - Basics of HTML.
  - Basics of CSS.
  - Bootstrap classes.
  - Basics of PHP.
  - SQL queries.
  - Connection between PHP and MySQL database.
  - Insertion and retrieval of data via the connection.
- The students were asked to make a website based on "Library Management" and create a database to store all information regarding it.
- By the end of the workshop, students were able to create a web application on their own.
- The workshop was a huge success and the students gave a positive feedback about the workshop and the speakers.
