Conducted By	<ul style="list-style-type: none"> <li>• Dipesh Patil(TE-COMPS)</li> <li>• Shivang Mehedekar (TE-COMPS) ( helping hand )</li> </ul>
Coordinators	<ul style="list-style-type: none"> <li>• Prajakta Pednekar (TE IT)</li> </ul>
Total Participants	<ul style="list-style-type: none"> <li>• 29 students</li> </ul>
Objectives	The prime <b>objective</b> of organizing this event is to teach the students the basics of adobe illustrator from scratch, how to use various adobe illustrator tools as well as CSS animation from scratch. So that at the end they can create a web animation project on their own from their own illustrated artworks.
Details of the Activity	The <b>Third CSX workshop</b> on Adobe Illustrator and Web Animation was a two day workshop organised and conducted by the CSX committee. The students from the FEs showed a huge interest in this workshop. All the students gathered in the computer centre by 9.30 am. The total count for the event was 29 students. Workshop started with first sessions on Adobe Illustrator on day one where students were taught how to use various tools like shape builder tool, pen tool, gradient tool, mesh tool, how to apply different stylize , 3D effects and many more

tools.They were taught how to export illustrator file in different file type (SVG,PSD,PDF,JPEG,PNG, etc) and how to create emojis. Then students created different artworks like logo , text styling ,etc in illustrator (using 3D, drop shadow, isometric shapes ,text styling and many more concepts) .  
On second day workshop began with web animation part where students were taught first the basic of CSS animation code and then how to import and use SVG files to create web animation Students created the web animation on their own from SVG file created by them in adobe illustrator using different tools. Workshop ended around 5pm on second day and all the doubts of students were solved during two days session.

**Outcome**  
Now students can create their own logos, emojis, poster , text styles and other artworks using Adobe Illustrator .They can do freelancing .They can apply the web animation to their illustrator artworks SVG file to their and create more interesting ,attractive websites.
