16th March 2022 9.00am - 1.00pm

Department:

IT, EXTC and Computer

No of participants:

IT Department: 67

EXTC Department: 68

Computer Engg. Department: 77

Description of EVENT:

One of the most significant phases of a student's education and professional development occurs during the last year of a graduating course. The primary reason final year projects are included in the course curriculum is to motivate students to put their academic knowledge to work in the real world. Students can combine their academic abilities with practical skills to solve real-world engineering and commercial challenges by working on final year projects.

Similar to this, it's crucial to obtain assistance while picking the right project topic at first. Hence, a Major Project Selection Presentation was conducted for BE students of the IT, EXTC on the 16th of July 2022 at 9:00 am in IT and EXTC labs respectively. Major Project Selection Presentation for BE Computer Department students were online on Google meet from 9:00 am to 12 pm and from 1.30 pm to 4.30 pm.

The Major Project Selection Presentations was organized by Project coordinators of all three departments under Innovation cell XIE. Industry professionals from different domains were invited to select and suggest innovative ideas for BE Projects. They provided students with insightful information, excellent recommendations and suggestions on the basis of their project topics.

Each project group presented three project ideas out of which the best project idea was selected by the selection panel and allotted as the major project.

Details of the resource persons for IT Department:
Mr. Atharva Wankhede
