

*A one day Quiz competition and Poster competition under Institution's Innovation Council (IIC)*

**Event Coordinator**

Dr. Bhagyashree Chari

**Time and Place**

27/03/2023

2:30 p. m. to 4:30 p. m.

Seminar Hall, 2<sup>nd</sup> Floor, XIE

**Department  
Applied Science &  
Humanities**

**No of participants: 51**

Institution's Innovation Council of Xavier Institute of Engineering organized a one day quiz competition for First year Engineering students. Year 2023 is marked as International Years of Millets by United Nations. Millets are rich source of fibres and cultivated in India since ancient times. In view of this and to spread awareness among the students, the Quiz Competition was organized on 27/03/2023. The theme of the quiz was "**Health and Nutrition from the food we eat**". A huge response was obtained from the budding engineers. 13, 16, 17 and 5 students from EXTC, CE, IT and CSE branch had participated in the event. The questions were based on the natural molecules such as Carbohydrates, Proteins, lipids and the food technology including the challenges faced by farmers in millets cultivation. The students were also asked to write an article on best health practices they follow to keep themselves fit. The winners of the competition were **Jordan Fernandes** and **Himanshu Pandey**. They were given a cash prize of Rs. 1000/- and Rs. 500/- only.

In order to spread awareness on protection of environment, a **One Day Poster Presentation competition** was also organized for FE students on the same day. The posters were hand – made and portrayed the future perspective/ innovative idea and they also highlighted some start – up ideas for research that can be implemented to save water. Best poster was presented by Ms. Cecilia Dinesh from CE branch. She depicted the best rain water harvesting technology through the poster in a 3D form. She was awarded a cash prize of Rs. 2000/-.

Overall, it was a successful event organized by the Applied Science and Humanities department under IIC.

**Benefits of the Event:**

The event will help the student to understand the importance of environment protection, health and hygiene. In future, the best food technology can be used for high production of millets that will help not only in carbon sequestration and prevent from global warming but also, motivate the farmers to attain sustainable agriculture development.

**Attainment of Graduate Attributes/Program Outcomes:**

This event is a small attempt to achieve successfully the program outcomes such as **PO 1**, i.e. Engineering Knowledge; **PO7** i.e. Environment and sustainability and **PO12** i.e., Life – Long Learning.

  
**Dr. Bhagyashree Chari**  
Convener IIC – XIE

  
**Prof. Vijay Kapure**  
President IIC – XIE

  
**Dr. Y. D. Venkatesh**  
Principal and Chairman IIC – XIE
